

24-PORT, 1U, BLANK FRONT-LOADING PATCH PANEL

Product Detail

Application

Overview

The 24-Port, 1U, front-loading UTP/FTP patch panel with rear cable management bar & grounding wire is uniquely designed to reduce installation time for installers and contractors, especially in environments with limited or difficult access behind racks, cabinets, and brackets in main distribution frames (MDFs) and intermediate distribution frames (IDFs).

Features

- Uses a 6-port module design.
- Front access design for easy module insertion and removal.
- Supports front/rear installation ideal for hard to access applications.
- Tool-free module insertion and removal from the front of the panel.
- Front loading simplifies upgrades and changes in existing networks.
- Compatible with universal keystone style connectors (sold separately).
- Easy port Identification with silkscreened port numbers for quick reference.
- Mounts on standard 19-inch equipment racks.

Compliance

- TIA/ANSI
- RoHS

Package Includes

- 24-Port Blank Patch Panel, 1 PC.
- Rear Cable Management Bracket, 1 PC.
- Mounting Screw, 4 PCS.
