WAVENET ROADMAP FOR ENDCAP OR GONDOLA MERCHANDISING PRODUCT DISPLAY

What is an Endcap or Gondola Merchandising Product Display?

An Endcap or Gondola Merchandising Product Display system is for displaying products, signage and branding at the point of purchase (POP) or point of sale (POS) in stores or distribution locations in order to increase sales.

It is the process by which sellers of products and services capitalize on the opportunities within the available selling space. A smart, well-organized display or merchandising plan can dramatically increase customer purchases and encourage sales, while a poorly designed display area will discourage additional purchases.

What are the benefits of an Endcap or Gondola Merchandising Product Display?

Effective Endcap or Gondola Product Display will:

- ✓ Showcase products
- ✓ Attract attention and generate excitement
- ✓ Communicate product and usage information
- ✓ Steer customers to special offers or core products
- ✓ Identify Wavenet brand name
- ✓ Increase sales
- ✓ Retain customers
- ✓ Differentiate Wavenet Connectivity & Cable Management offerings
- ✓ Display literature: Product Line cards and Cable Product Guides

Winning Strategies with Merchandising Product Display

- ✓ Avoid overcrowding aisles
- ✓ Use Endcaps or Gondolas to develop aisles and departments by product categories
- ✓ Once placed, organize them with a mix of shelves, pegboards/hooks (optional)
- ✓ Group direct related products together
- ✓ Place most profitable and top selling products at eye level

What Merchandising Product Display method do distributors need?

The following are the basic paths for driving sales at the Walk-In, Will/Call or Retail Store level. They form the foundation for a coordinated use of space and the visibility of products and brand name.

Type of Product	Description	Use
ENDCAP OR GONDOLA	**CONSIST OF BASE, FRAME, HEADER AND AN AREA FOR MERCHANDISING CORE PRODUCTS**	**DISPLAYING PRODUCTS AT EYE LEVEL, IN AN OPTIMUM LOCATION**
