

# CAT6A 600MHz UTP Patch Cables With Molded Snagless Boots

## Product Detail

## Overview

CAT6A 600MHz high performance unshielded (UTP) patch cables are made from 4-pair 100% bare copper stranded cables. The RJ-45 connectors consist of 50-micron gold-plated contacts for optimum performance. They also made with molded snagless boots to help prevent locking tab from snag when plugging and unplugging.

## Features

- Made from 100% bare copper stranded UTP cables
- RJ-45 connectors with 50-Micron gold-plated contacts ensure clear transmission by eliminating signal loss due to corrosion
- 24 AWG 4 twisted pairs stranded bare copper
- Molded snagless boots are designed to protect the locking tab of the RJ45 connector when plugging and unplugging
- Supports 600MHz 10Gigabit Ethernet bandwidth
- Wired to T568B, Straight

## Wiring Scheme

### T-568B

Connector A : Cat. 6a UTP Plug  
 Connector B : Cat. 6a UTP Plug  
 Conductor : 4 Twisted Pairs Cat. 6a 24 AWG. UTP with Cross  
 Wiring Scheme : T-568B

## Standards & Compliances

- EIA/TIA standard
- ETL/UL
- RoHS

## Package Includes

- CAT6A UTP Molded Snagless Boots Patch Cord, RJ-45/RJ-45 - 1 PC.
